Projects completed:

- **Raspberry Pi as Router (B.Tech Final Year Project):**
This project aims to build Raspberry Pi as a Router which is easily configurable via a dynamic web interface. The Pi can be held in your hand. Which reduces the difficult configuration process and maintenance as well.
- **Meanit Android Project:**
The prime objective of "Meanit" application is to find the meaning of the word. But somewhat in a different way. If you are reading any text and don't understand any word then you have to just copy the word and shake your phone and you will get the meaning of the word in the form of notification.
- **Environmental Science Project of Global Warming:**
The project is about to create an awareness about environmental Global Warming by using animation. In this project, we used Alice animation software. This project aimed to create animation video which shows major causes, effects of global warming and gives a social message using Alice 2.3 animation tool.
